Legend

▽ = transparent (falls through to layer below)
 ▒ = layer is active from this key (held)
 Brt = brightness (value) Sat = saturation Spd = speed
 BOOT = enter bootloader for flashing
 Tog = toggle RGB on/off

Bottom row mod-taps (Layer 0): hold for modifier, tap for letter.

On transparent layers, bottom row mods fall through from Layer 0.

RGB settings (brightness, saturation, effects) persist across all layers.
Only the hue changes per layer.
